

No Disposal Works Septic System Permits After December 15th

The Board of Health will not be issuing any new septic system installation or repair permits after December 15th due to frozen or unfavorable ground conditions. Permits will be issued after March 1st, weather and ground conditions permitting.

If a homeowner has an emergency where the systems has backed up into the house or breaking the surface of the ground, the Board of Health may grant an exception and issue a permit.

Persons applying for a Deep Hole and Percolation Test should be aware of this.

For any questions, please contact the Board of Health Office.
